Do you want to
get rid of Hard water ?

How does Weismacher work ?

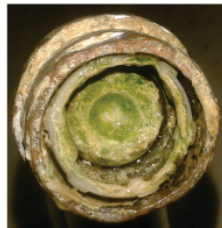

Weismacher is an electromagnetic water conditioner that reduces the energy consumption and extends the life of equipment by not allowing the forming of hard scale and also remove old scales.

The three pictures depicted below show the effects of Weismacher water conditioner on water

Before

After 30 days

After 45 days

Benefits of Weismacher

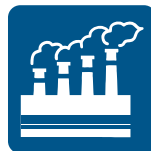

- ◆ Taking bath with hard water damages the skin. On the other hand, magnetic water, when used for bathing purpose, makes the skin more healthy and beautiful.
- ◆ Hard water makes the hair rough. Magnetic water enhances the beauty of the hair, reduces the usage of shampoo and makes the hair soft, silky and shiny, may be use of hair conditioner not needed.
- ◆ Hard water, when used in agricultural fields and gardens, reduces the porosity of sand, because of which the growth of plants gets retarded and the quality of land gets eroded. Magnetic water doesn't allow minerals to accumulate on sand and is also helpful in the growth of plants.
- ◆ As detergent soap doesn't mix well with hard water, it increases the use of soap and doesn't wash the clothes properly. Magnetic water works up a good lather and thus aids in proper and effective washing of clothes, saving on soap/ detergent.
- ◆ Even in Industries, because of hard water, minerals get deposited in the pipes resulting into clogging in inner diameter of the pipes. This results in to reduction of force in water supply thus increasing electricity consumption. Magnetic water doesn't allow mineral deposits, thus maintaining the force of water. This saves energy and controls the formation of minerals in the boiler and cooling tank.
- ◆ The absence of harmful chemicals in magnetic water helps prevent pollution of the environment.

The installation of Weismacher water conditioner is very simple and easy. Steps for self installation of this product are contained in the CD accompanying the product.

Where Weismacher can be used?

Residences

Industries

Agricultural Farms

Hospitals

Laboratories

Swimming Pools
